Mr. Bill Sheward
Director of Public Service/Safety

Dear Mr. Sheward:

After personally reviewing the City of Jackson Memorial Building roof and discussing the conditions with some of my colleagues that have decades of experience with both new and re roof foam projects, I have decided to submit the following proposal additions to the architect's project manual per his approval.

The upper roof appears to be in generally good condition. IRC will infrared scan existing upper roof. Tear out wet foam and replace wet areas with fresh foam and recoat with 30 mills of silicone and granules.

The barrel roof is pitted badly. IRC will tear off down to built up roof and install brand new foam roof per specs at 1 1/2" thick and apply 30 mills silicone and granules. Essentially, the City of Jackson will have a brand new roof in the large barrel section, with the entire building issued a leak free, non-prorated 10 year warranty.

Sincerely,

Mike Suess
