

# Boil Advisory

Thursday June 1, 2017 the City of Jackson will be replacing a fire Hydrant on Harris St. beginning at 8:00am. During this time water customers on Harris St from Huron to Ralph St may experience low or no water pressure. Once service is restored, those affected customers will be under a boil advisory until further notice. Bring all water to a full boil for two minutes before consumption. Please check water clarity before doing laundry. You may experience discolored water and air in your lines. The repair is anticipated to be completed in four hours or less. The City thanks you for your patience in this matter. Call 740-286-3271 with any questions.
