Re: CO/RT/SEC: JAC / CR9 / 0.12  
PID No.: 85602

Directors Final Journal Entry for the following: relocate existing County Road 9 (Keystone Furnace Road) to create a separated grade intersection over US 35 in Jackson County and the City of Jackson. The relocation will create right-in/right-out access to US 35 for County Road 9 and McCarty Lane. Besides realignment of County Road 9 and McCarty Lane in the City of Jackson, the project will also realign portions of Acey Avenue in the City of Jackson and County Road 87 (Industry Drive). A modern roundabout will be constructed at the intersection of County Road 9 and McCarty Lane as part of this improvement. All median access at this intersection on US 35 will be removed and both eastbound and westbound deceleration lanes will be constructed on US 35 as well. Jackson County and the City of Jackson will retain ownership of the county/city roadway improvements while the Ohio Department of Transportation will acquire ownership of the proposed structure over US 35.

Board of Commissioners, Honorable Mayor, and City Council:

In accordance with Section 5511.01 of the Ohio Revised Code, I hereby certify the following Final Journal Entry (JE) for the **Improvement and Relocations** as described below for sections of US35, CR9, and CR87, within the County of Jackson and McCarty Lane, and Acey Avenue within the City of Jackson.

A Public Hearing was held concerning these actions on Thursday, February 24, 2011 at the Markwy Cultural Arts Center, 269 East Main Street, Jackson, Ohio from 6 PM to 8 PM.

This Director's Final Journal Entry for the above mentioned **Improvement, Relocation, and Realignment** is the proper entry in the Journal of the Director of Transportation and shall be found referenced therein. Said Journal shall be found in the District 9 Planning & Programming office.

**Realignment of Acey Avenue**

And being more fully described as follows:

Situated in Salt Lick Township within the corporation limits of the City of Jackson, it is proposed to realign Acey Avenue to intersect the new CR9 approximately 550' west of its current intersection with McCarty Lane.
